1 Warnings

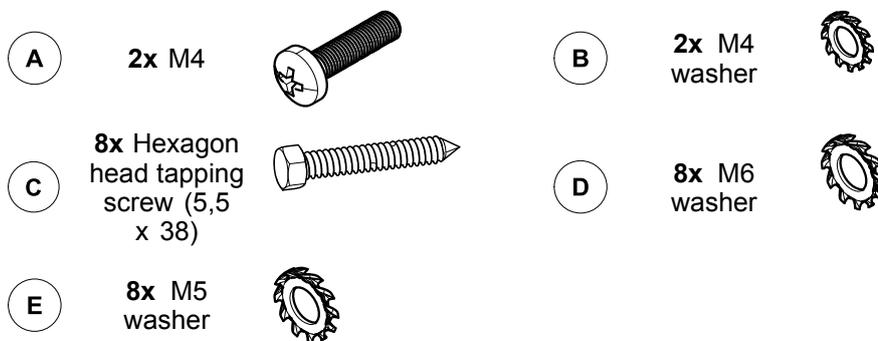

Warning

- Consider the unit weight when mounting!

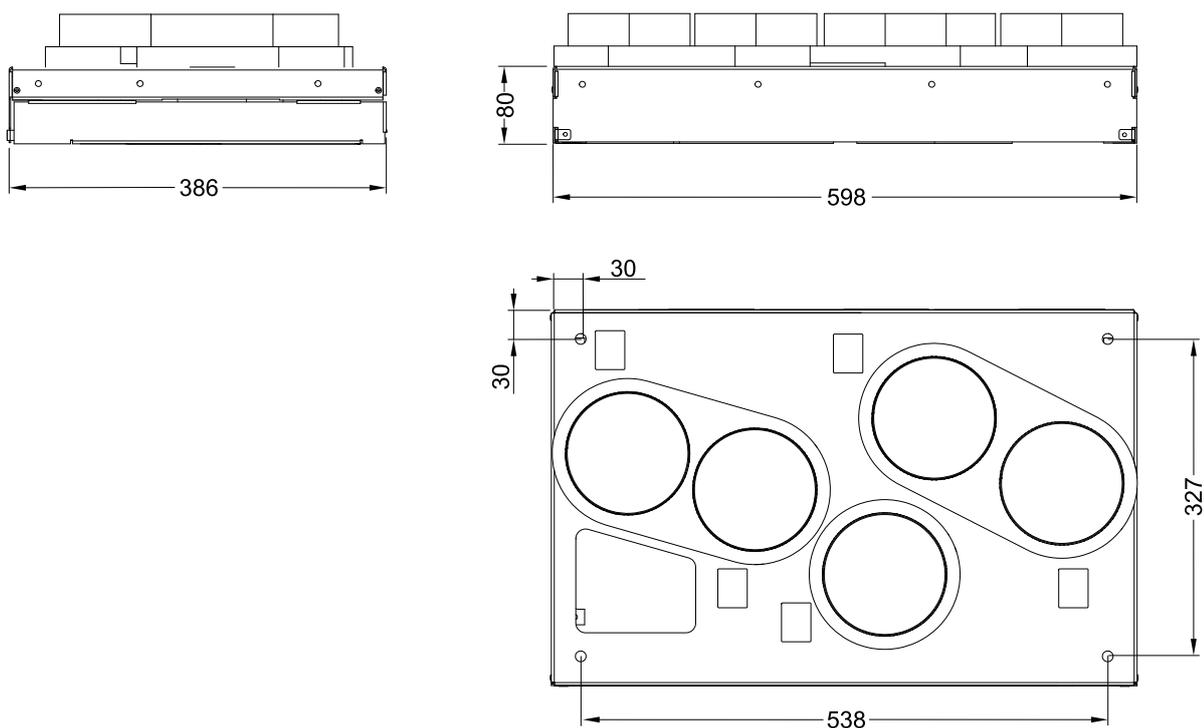

Important

- Beware of sharp edges during mounting and maintenance. Use protective gloves.
- This product must only be operated by a person which has suitable knowledge or education within this field or carried out with the supervision of a suitably qualified person.

2 Included items

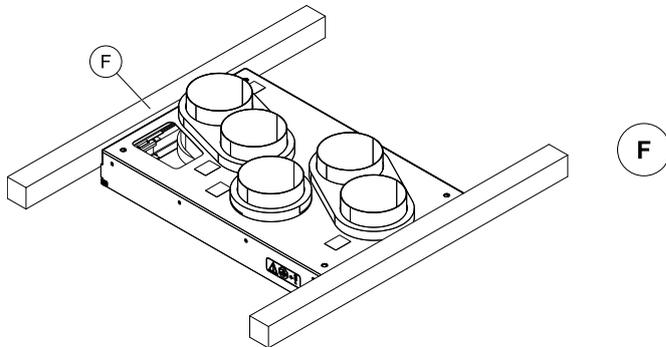

3 Dimensions (mm)

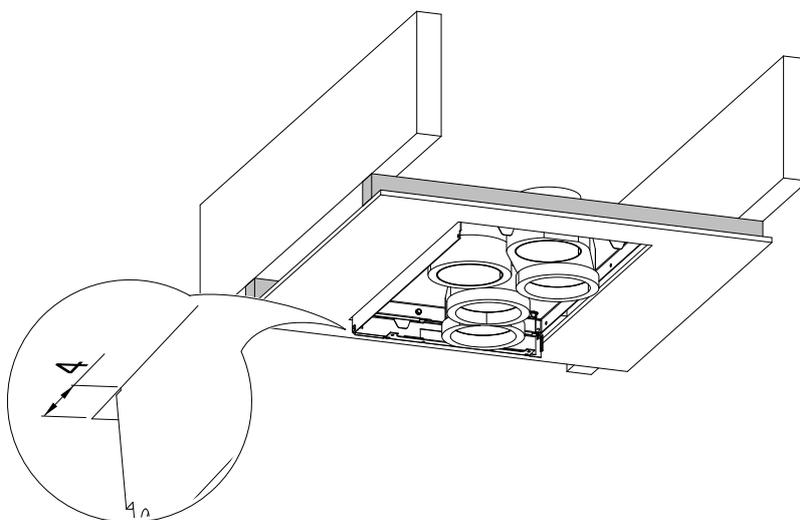

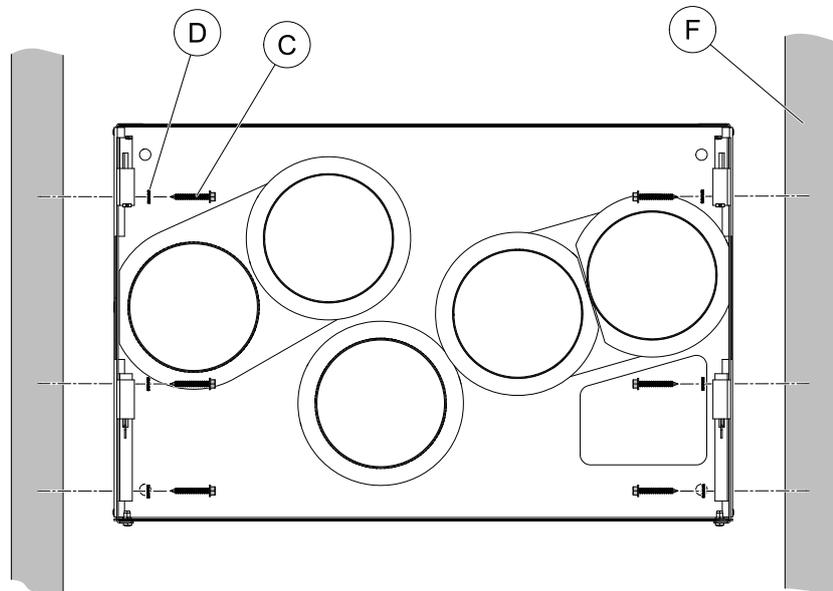

4 Installation options

4.1 Fitting with battens

2x Batten (minimum 45 x 45 mm)

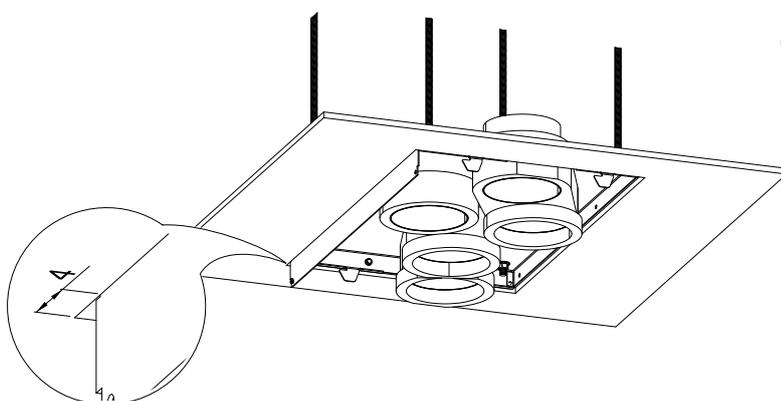

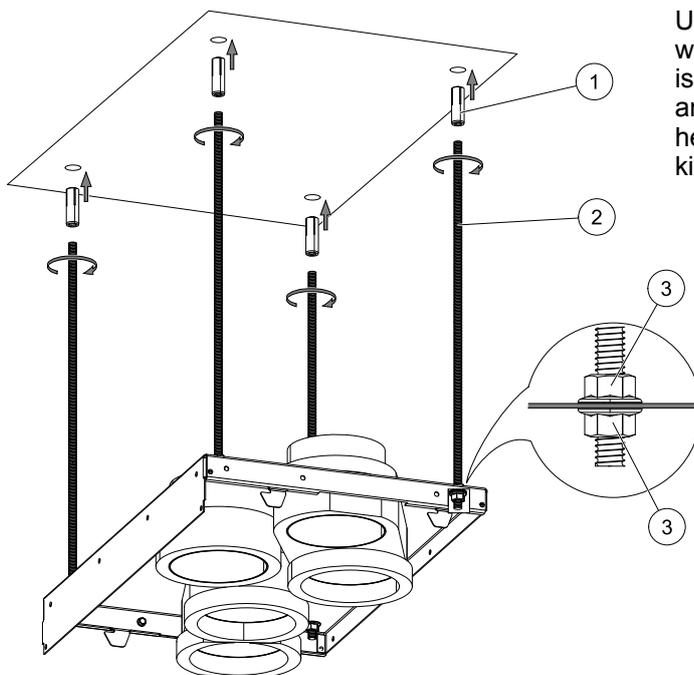

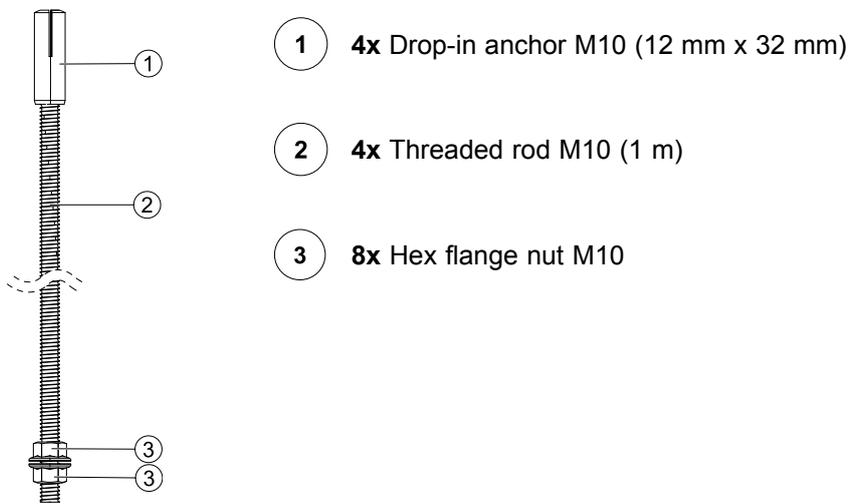

Battens (F) should be screwed to the ceiling mounting kit from inside of both sides with added self-tapping screws (C) and washers (D).

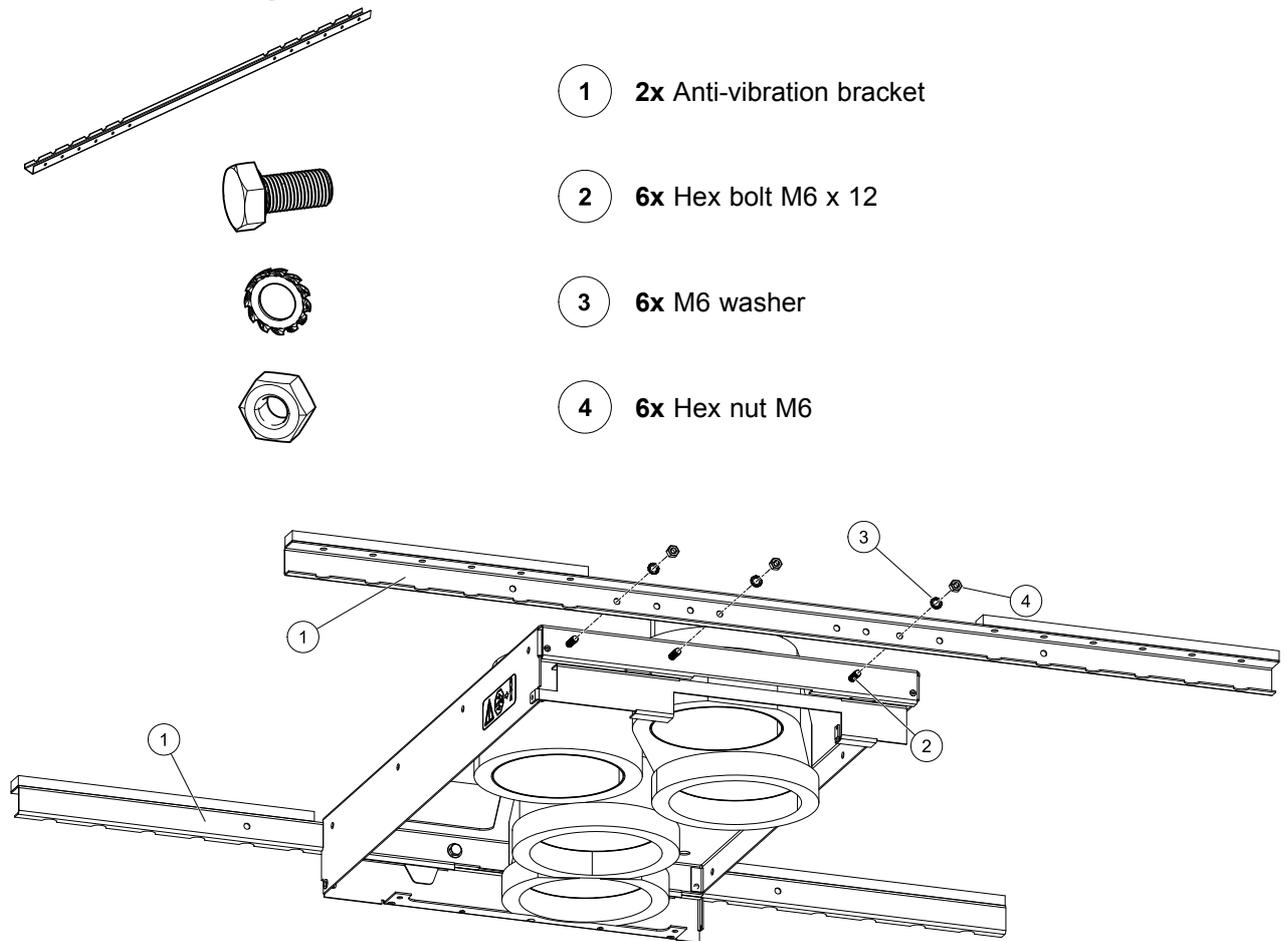

Screw battens with a ceiling mounting kit to the main ceiling. These screws are not included. Choose them based on your ceiling structure.

Leave at least a 4 mm gap between ceiling mounting kit and false ceiling to prevent vibration noises.

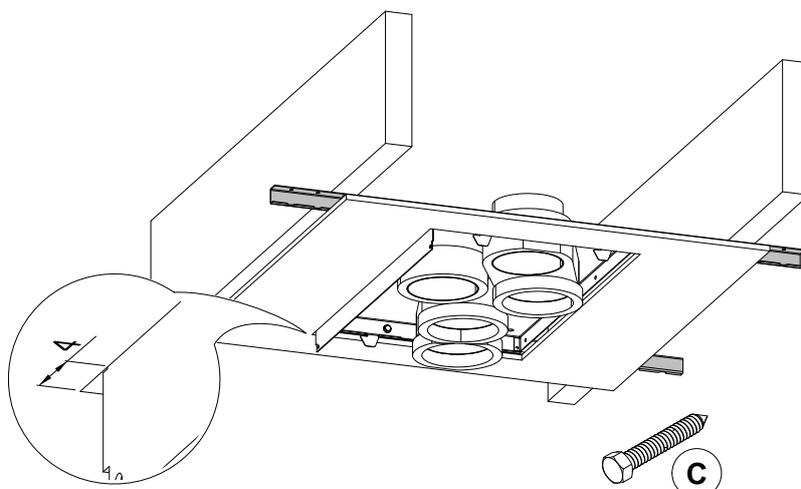

4.2 Fitting to concrete with threaded rods (accessory, art. no. 134014)

4.3 Fitting with anti-vibration mount (accessory, art. no. 134009)

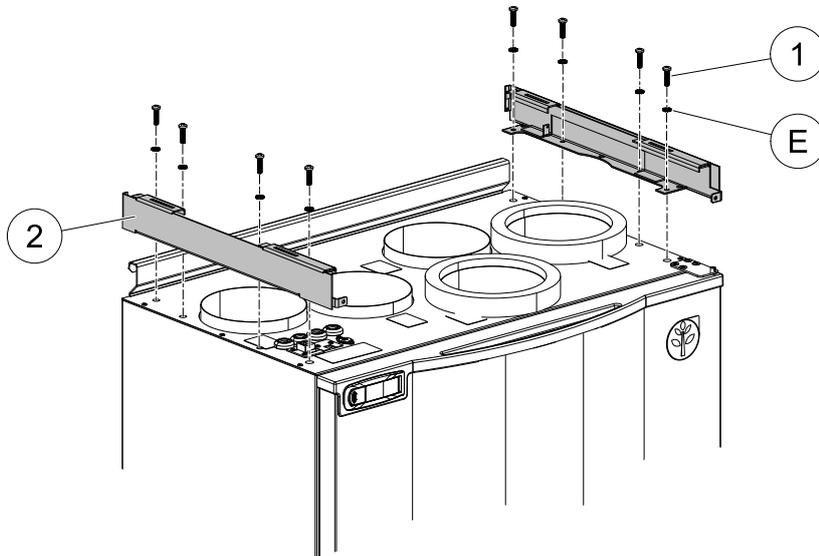

Anti-vibration brackets (1) should be screwed to the ceiling mounting kit from both sides with added hex bolts (2) and tightened with washers (3) and hex nuts (4).

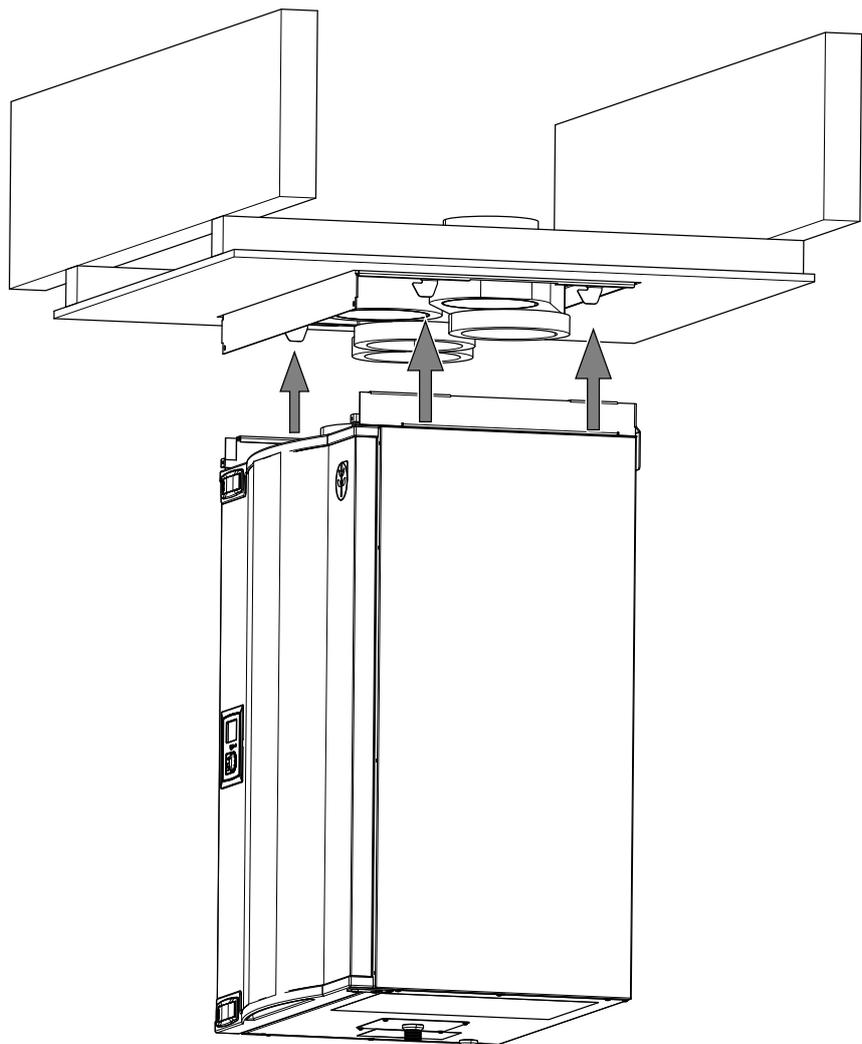

Screw anti-vibration brackets with a ceiling mounting kit to the main ceiling. Use included screws (C).

Leave at least a 4 mm gap between ceiling mounting kit and false ceiling to prevent vibration noises.

5 Mounting the unit

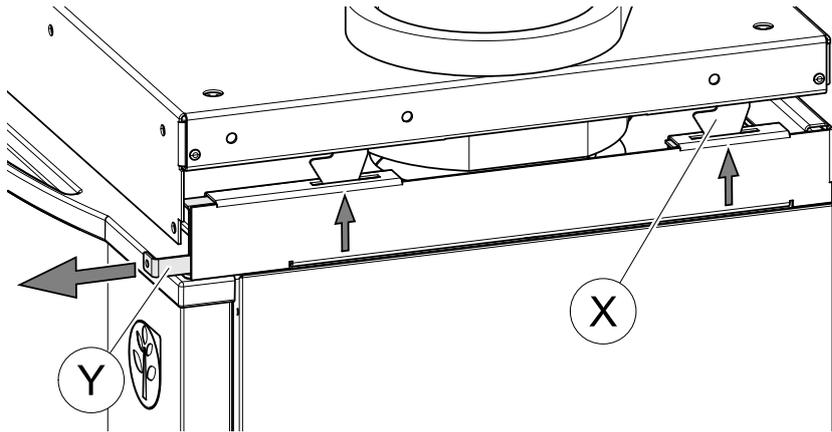

Loosen 8 M5 screws (1) on both sides of the unit. Attach side brackets (2) that came with ceiling mounting kit and secure them with the same screws (1) and included washers (E).

Warning

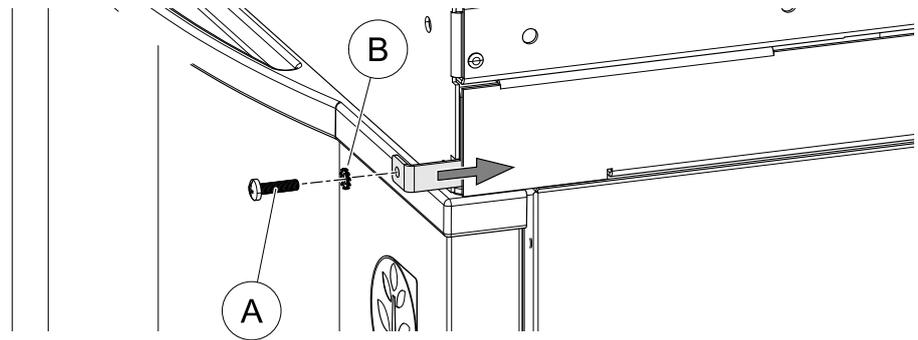

Consider the unit weight when mounting!

The cabling on the top of the unit have to be led through a hole in the ceiling mounting kit. Then lift the unit and press it to the ceiling mounting kit.

Lock hooks (X) should go through brackets. Pull out the lock mechanism (Y) if needed.

Screw the locking mechanism on both sides using the screws (A) and washers (B).
