

OPTIMA-R

Single or double skin circular VAV units

Ordering codes:

Ordering code example:

OPTIMA-R - 10 - BLC1 - 50 - 110 - 0

OPTIMA-R size 100, not isolated, with LMV-D3 MP-bus communicative controller/drive, $V_{min} = 50$ m³/h, $V_{max} = 110$ m³/h, control voltage DC 0-10V.

NOTES:

- If the air volumes are not given during the ordering process, then standard Factory setting will be applied according to table
- V_{min} can also be set to 0 m³/h if required by demand upon ordering
- The setup values of V_{min} and V_{max} must be inside the range of min / max factory settings (see dimensions / volumes table)
- The standard input signal on the controller is set to 2-10 V, upon request 0-10 V can also be selected

Description

Single or double skin circular VAV terminal units are commonly used for return air applications or for supply applications at low system pressures. Optima terminal units are ideal for single zone control with supply and return in Master and Slave setup such as offices, hotel rooms or meeting rooms where the required cooling and heating load will vary on demand.

Highlights:

- Damper tightness class 4 according to EN 1751
- Casing tightness class C according to EN 1751
- ILH Hygienic certification VDI 6022 & VDI 3803 for Standard Ventilation & Clean room application
- High measuring accuracy of 5 %
- Air volume range of 36 to 14589 m³/h
- Operating range of up to 1000 Pa
- Double skinn version OPTIMA-R-I with external 50mm noise & thermal isolation under steel sheet cover

Accessories for OPTIMA-R:

- Attenuators THP

Silencers are available to reduce the discharge sound power levels when required. Multi-outlet insulated terminal units are available when multi-zone application is required.

Design

VAV unit housing is constructed from galvanized sheet steel. Special design of multi-point averaging cross flow sensor assures an accurate air flow readings even in difficult installations.

Available sizes:

Inlet / outlet: from \varnothing 80 to \varnothing 630 mm

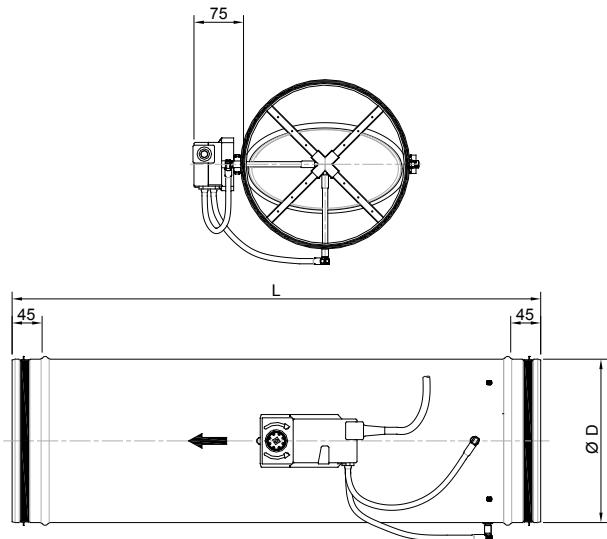

Fig. 1: OPTIMA-R dimensions

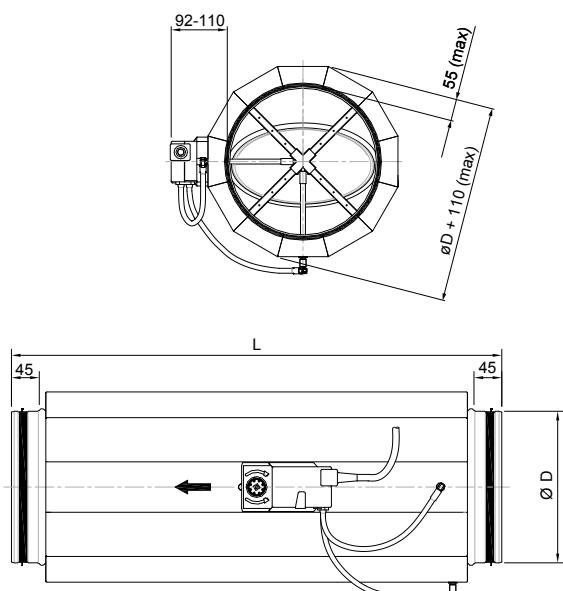

Fig. 2: OPTIMA-R-I dimensions

Controls

The VAV terminal units are as standard equipped with BLC (Belimo compact) controllers (LMV-D3 or NMV-D3) without any MP or LON communication capability to be used as stand alone or in master and slave setting. The compact controllers are equally available with MPBus, ModBus and LON communication capability. On demand as alternative, Gateway communication units can be provided and can be connected later in time to building management systems to create a zone control by creating bus-rings solutions (only possible if MP-Bus communication is installed).

VAV and Compact controllers are factory calibrated as standard to the air volume indicated in the table or upon request can be adjusted to site required settings prior to dispatch on V_{min} and V_{max} range. The air volumes can also be readjusted on site with ZTH-Gen hand held service tool or, for the type OPTIMA-S-...GO... by dials on the controller. If specific air volumes for V_{min} and V_{max} would be required, this must be indicated prior to order of the units for adequate calibration in the factory.

- BLC1 = Belimo LMV-D3 compact controller WITH MP-Bus communication
- BLC4 = Belimo LMV-D3 compact controller WITHOUT MPBus communication
- BLC1-MOD = Belimo LMV-D3 compact controller WITH MODBUS communication
- GO = Compact controller with parametrizing dials and display for immediate adjustment at site.
- GO-MOD = Compact controller with parametrizing dials and display for immediate adjustment at site, communicative via MODBUS-RTU.

Tab. 5: OPTIMA-R radiated sound power levels

 ΔP_{\min} (Pa), Minimum pressure loss exerted on the system with Damper fully open L_w dB(A), Discharged or Re-generated Sound Power levels in dB(A) $\Delta P = 100 \text{ Pa}$, Soud power levels at system atatic pressure level Pa per Octave Hz

Mounting

Measuring track length after Elbow or a T-branch etc. installations, L to be min. 3 times duct diameter. If L can not be respected, then minimum of 2 × diameter with perforated equalizing grid should be installed.

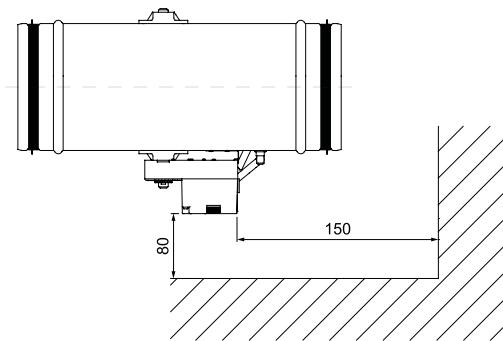

Fig. 5: OPTIMA-R-BLC_ installation
