

## Make an excellent return on investment!

### LIVING can help in multi-occupancy buildings

Heat that you have already paid for can be used more efficiently. Instead of just ventilating out the hot extract air, the heat in the air can be applied to the radiator circuit by using highly efficient Systemair heat exchangers and heat pumps.

LIVING gives you better ventilation, energy efficiency and reduced operating costs. Since all this increases the value of your property significantly, an investment in LIVING could be one of the best investments you could make.

Contact us to learn how much you can save with LIVING.

*LIVING is an energy efficient compact unit with smart design.*

Systemair was founded in 1974 and has subsidiaries in 45 countries worldwide and approximately 4,500 employees. We sell to over 100 countries and our product range includes comfort and safety ventilation. Systemair is listed on Nasdaq OMX Nordic Exchange in Stockholm.
