

BA plus

Next generation air handling

Production

BA units are produced in 41 different models handling air flow capacity up to 178000 CMH

Variants

Available with centrifugal DIDW/Plug fans, EC/PM motor combinations.

Plug-n-play

The Units have built-in control system and are delivered pre-configured, tested at the factory.

BA software

BA software makes technical calculation and automatically generates complete technical documentation in pdf format.

Easy transportation

BA units can be shipped in fully assembled, modular or flat pack condition.
