

Control

This air curtain is supplied with an integrated PC board SIRE. There are three different levels with different functionality to choose from, Basic, Competent or Advanced.

SIRE Basic gives simple control at a low cost. SIRE Competent and SIRE Advanced anticipate and learn the needs of the entrance they are installed in (e.g. opening frequency and outdoor temperatures). It has calendar function and selectable switch off at set temperatures for up to nine units. Because the fan speed is adapted, the sound level is optimized and is never higher than is necessary for comfort. With SIRE Advanced it is possible to choose between Eco and Comfort mode dependent on whether energy savings or optimal comfort has been prioritised. The return water temperature can be limited, thus ensuring that the available heat is exploited to the maximum.

Read more about the SIRE control system in the "Controls" section.

Type	Description
SIREBN	Control system SIRE Basic
SIREACY	Control system SIRE Competent
SIREAAY	Control system SIRE Advanced
